For Immediate Release, Press Release

Advance CNC Machining, a manufacturing facility in Columbus, Ohio contracts WiFi Solutions Group to install WiFi throughout their manufacturing Facility

Columbus, OH May 10, 2014

Plagued by poor Wireless connectivity in their Factory, Advance CNC Machining contacted the WiFi Solutions Group to evaluate the feasibility of deploying a WiFi Network throughout their factory.

On May 5, 2014, Advance CNC Machining informed WiFi Solutions that their Proposed Solution was approved and accepted and the WiFi Solutions Group was contracted to deploy a Wireless Network throughout the Advance Machine factory. The WiFi Solutions Group Solutions was chosen for its cost effectiveness and for its detailed technology application to the environment at the Advance CNC Machining Factory.

Advance CNC Machining specializes in providing high quality machined parts to many great manufacturers throughout North America. Our expertise in high speed, 4-axis CNC machining has allowed us to quietly become one of the most sought out machining companies in the United States. Advance CNC Machining relies on the Makino & Okuma brands of CNC horizontal machining centers including the A51nx, the most advanced horizontal machining center in the world. Our Makino A51nx CNC machines take part productivity, accuracy and machine reliability to the next level. Advance CNC Machining is now certified to the ISO 9001:2008 standard without design. This quality management system is applicable to the machining and manufacturing of parts to customer requirements. We are delighted to better serve our customers through the well-defined and documented procedures this certification requires. While we've always been committed to quality in our products and services, this certification ensures a more productive environment through faster identification and resolution of quality issues, among many other benefits. Achieving this ISO certification reinforces our commitment to our quality management system, continuous improvement and customer satisfaction. It means that we will continuously monitor all processes that may affect quality, keep proper records and check parts for possible defects both during and after any manufacturing or finishing process. We partnered with Smithers Quality Assessments, an accredited quality and environmental management systems certification body, to achieve our certification and will continue to work with them to ensure our quality management system is as effective as possible.

WiFi Solutions Group is a Systems Integrator that specializes in the Design, Deployment and Management of Secure WiFi Networks for both indoor and outdoor environments. For more information call 1-855-723-WIFI (9434) and ask for sales.
